NEXUS 2026 — WEBSITE PRODUCT REQUIREMENTS DOCUMENT (PRD)

Product: NEXUS 2026 — CSI Student Summit on Innovation & Technology
Organiser: CSI Student Chapter, NMAMIT
Host Institution: NMAM Institute of Technology, Nitte
Event Date: 25 November 2026
Venue: NMAM Institute of Technology (NMAMIT), Nitte, Karnataka
Website: csinmamit.in
Primary Objective: Present NEXUS as a premium, technology-focused student summit and provide a simple college-level registration experience.

---

1. PRODUCT VISION

Build an immersive, modern and responsive website for NEXUS 2026 that reflects the summit's identity and communicates its purpose, activities, schedule and participation details.

The website should act as:

1. The official digital brochure for NEXUS 2026.
2. An information platform for participating CSI student chapters.
3. A registration portal for colleges and their representatives.
4. A central source of event updates and contact information.

The website must maintain the visual identity of the official NEXUS poster and brochure.

Core positioning:

NEXUS — Connecting Chapters. Inspiring Innovation.

The experience should feel futuristic, professional, technology-oriented and editorial rather than like a generic event landing page.

2. SCOPE

Phase 1 — Website and Registration

Build the following:

- Home / About NEXUS

- About the Hosts
- Event Schedule
- Industry Panel Discussion
- CSI Chapter Showcase
- Student Project Expo
- Contact Details
- Registration Form
- Registration Confirmation
- Basic Admin Dashboard

Phase 2 — Future Enhancements

Do not implement these in the initial release:

- Jury registration and accounts
- Jury assignment
- Project evaluation and scoring
- Results and winner announcements
- Certificate generation
- Attendance management
- Advanced event analytics
- Live event updates dashboard

The architecture should allow these features to be added later.

---

3. WEBSITE INFORMATION ARCHITECTURE

The website must follow this exact page sequence:

1. Landing Page — NEXUS Introduction and Hosts
2. Event Schedule
3. Industry Panel Discussion
4. CSI Chapter Showcase
5. Student Project Expo
6. Contact Details
7. Registration Form

The registration form should be accessible through a prominent **REGISTER NOW** button throughout the website.

The registration form should be a separate page and should not be mixed into the informational pages.

Navigation

Recommended navigation:

- Home
- Schedule
- Industry Panel
- Chapter Showcase
- Project Expo
- Contact
- Register Now

The Register Now CTA should stand out visually.

On mobile, use a compact navigation menu with a clearly visible registration CTA.

---

4. VISUAL IDENTITY AND DESIGN SYSTEM

The uploaded NEXUS poster is the primary visual reference.

4.1 Design direction

The visual direction should combine:

- Futuristic technology aesthetics
- Premium editorial typography
- Dark cinematic backgrounds
- Monochromatic imagery
- Subtle neon-green accents
- High-contrast text
- Minimal but purposeful animations

Avoid generic templates, excessive gradients, colourful cards, cartoon illustrations and conventional corporate website styling.

4.2 Colour palette

Use the poster as the reference for the colour system.

Element	Suggested treatment
Primary background	Deep black / charcoal
Secondary background	Dark graphite
Primary text	White
Secondary text	Muted grey
Accent	Futuristic emerald / neon green
Supporting accent	Muted silver / grey
Borders	Subtle dark grey

Green should be used selectively for highlights, interactive elements and important visual details.

The website should primarily remain black, white and grey with controlled green accents.

4.3 Typography

Use a combination of:

- Elegant serif typography for major editorial headings, especially NEXUS.
- Clean sans-serif typography for body content, navigation and buttons.
- Large, bold, uppercase typography for important section headings.
- Clear readable text for event information.

The NEXUS title should visually resemble the typography on the official poster.

Recommended typography direction:

- Display: elegant editorial serif.
- Body: modern sans-serif.
- Labels and metadata: compact uppercase sans-serif with subtle letter spacing.

4.4 Imagery

Use the futuristic sculptural face / technology-inspired visual from the NEXUS poster as the main visual reference.

Image direction:

- Dark monochromatic 3D sculptures.
- Futuristic human or robotic forms.
- Technology-inspired textures.
- Emerald-green illuminated details.

- Abstract digital structures.
- High-quality, cinematic compositions.

Use the actual poster artwork wherever appropriate. Do not replace the NEXUS identity with unrelated stock photographs.

4.5 Animation and interaction

Recommended:

- Smooth page transitions.
- Subtle fade-in and reveal animations while scrolling.
- Slow-moving background visual elements.
- Subtle hover effects on navigation and buttons.
- Smooth scrolling between sections.
- Restrained parallax effects on hero imagery.

Animations must not interfere with readability or page performance.

Provide a reduced-motion experience for users who prefer less animation.

---

5. PAGE 1 — LANDING PAGE

Purpose: Introduce NEXUS, communicate its identity and establish the credibility of the host institution and organising chapter.

This page should make the strongest visual impression.

5.1 Hero Section

The first screen should prominently feature:

NEXUS

CSI STUDENT SUMMIT ON
INNOVATION & TECHNOLOGY

25.11.2026

NMAM Institute of Technology, Nitte

Hosted by
CSI Student Chapter, NMAMIT

Primary CTA: REGISTER NOW

Secondary CTA: EXPLORE NEXUS

Visual requirements

- Full-screen or near-full-screen hero.
- Dark cinematic background.
- Large NEXUS typography.
- Main futuristic poster artwork or an appropriately adapted hero composition.
- NMAMIT and CSI logos positioned neatly.
- Date and venue clearly visible.
- Strong visual hierarchy.

The hero should closely resemble the supplied poster rather than introducing a different identity.

5.2 About NEXUS

Heading: ABOUT NEXUS

Content:

NEXUS — CSI Student Summit on Innovation & Technology is a flagship initiative by the CSI Student Chapter, NMAMIT, bringing together students from CSI student chapters across Karnataka, along with faculty members and industry professionals.

The summit provides a common platform for students to exchange ideas, showcase innovation, develop leadership skills and explore emerging technologies.

Through industry interactions, chapter presentations and project exhibitions, NEXUS aims to strengthen connections between student communities, encourage interdisciplinary collaboration and create opportunities for future partnerships.

Connecting Chapters. Inspiring Innovation.

Display key information as prominent statistics or visual highlights:

- 30+ CSI Student Chapters — Target participation
- 100+ Students — Expected participation
- Industry Professionals
- One Day of Innovation and Collaboration

These are proposed participation targets, not confirmed attendance figures.

5.3 About the Hosts

This section should contain two separate host profiles.

About NMAMIT, Nitte

Use the approved brochure content:

Established in 1986, NMAM Institute of Technology (NMAMIT), Nitte, is a constituent college of Nitte (Deemed to be University), Mangaluru.

The institution fosters academic excellence, innovation, research and industry engagement.

Display the institution's approved profile and relevant institutional highlights from the brochure.

About CSI NMAMIT

Established in 2007, the Computer Society of India (CSI) Student Branch, NMAMIT, has grown into a vibrant technical community with over 700 student members and 350+ technical events.

Through hackathons, coding competitions, workshops and industry interactions, the chapter promotes technical learning, practical skills and innovation.

CSI NMAMIT has received national recognition, including the Best Accredited Student Branch and Largest Student Branch Awards (2017–19).

5.4 Host identity

Display:

- Nitte (Deemed to be University) / NMAMIT identity.
- NMAMIT logo.
- Computer Society of India logo.
- Hosted by CSI Student Branch, NMAMIT.

Use the official logos and maintain their proportions.

---

6. PAGE 2 — EVENT SCHEDULE

Heading: THE DAY AT NEXUS

Purpose: Give visitors a clear overview of the entire summit.

Display the schedule as a visually engaging vertical timeline.

The timeline should use a futuristic, technology-inspired aesthetic while keeping the times and event names readable.

Event Schedule

Time	Activity
9:00 AM – 9:30 AM	Registration & Breakfast
9:30 AM – 10:30 AM	Inauguration & Keynote
10:30 AM – 11:30 AM	Industry Panel Discussion
11:30 AM – 1:00 PM	CSI Chapter Showcase
1:00 PM – 2:00 PM	Lunch & Networking
2:00 PM – 4:00 PM	Student Project Expo
4:00 PM – 4:30 PM	Snacks
4:30 PM – 5:30 PM	Valedictory Ceremony

Design requirements

- Vertical timeline.
- Clearly visible time markers.
- Distinct visual treatment for each event.
- Subtle neon-green timeline accents.
- Dark background.
- Smooth reveal animation while scrolling.

Do not make the schedule dependent on animation; it must remain readable even when animations are disabled.

---

7. PAGE 3 — INDUSTRY PANEL DISCUSSION

Heading: VOICES OF THE FUTURE

Title: INDUSTRY PANEL DISCUSSION

Topic:

From Skills to Startups: Preparing the Next Generation of Tech Innovators

Description

An engaging discussion with industry professionals and innovators on emerging technologies, industry expectations, career readiness and entrepreneurship.

Gain insights into the skills shaping the future of technology and learn how to turn ideas into real-world solutions.

Discussion Highlights

1. Industry Readiness

Skills and competencies employers value.

2. Emerging Technologies

Opportunities and challenges in the evolving technology landscape.

3. Innovation & Entrepreneurship

Turning ideas into practical solutions and startups.

4. Career Pathways

Navigating opportunities and preparing for the future.

Design requirements

- Strong editorial heading.
- Futuristic background artwork.
- Topic displayed prominently.
- Four discussion highlights in a clean layout.
- Space to introduce panelists later.

Future enhancement: Panelist profiles, photographs, designations and moderator information can be added once confirmed.

Do not display placeholder panelist names or invented profiles.

---

8. PAGE 4 — CSI CHAPTER SHOWCASE

Heading: CHAPTERS IN FOCUS

Title: CSI CHAPTER SHOWCASE

Tagline: One Community. Many Journeys. Shared Impact.

Description

The CSI Chapter Showcase provides a platform for student chapters from across Karnataka to present their journeys, achievements and contributions to the technical community.

It celebrates student-led initiatives, encourages the exchange of ideas and creates opportunities for collaboration between chapters.

What Each Chapter Will Present

Each participating CSI chapter will deliver a five-minute presentation highlighting:

1. Chapter Overview — Chapter introduction, vision and community.
2. Activities & Initiatives — Events, workshops and engagements.
3. Achievements & Highlights — Key milestones and collaborations.
4. Student Innovation — Projects and member initiatives.
5. Future Roadmap — Upcoming goals and collaborations.

Presentation details

- Duration: 5 minutes per chapter.
- Format: Standardised presentation template.
- Q&A: No separate Q&A session.

Required website elements

- Description of the showcase.
- Presentation format.
- Five content areas.
- Downloadable standardised presentation template.

The template should be accessible through a clear **DOWNLOAD PRESENTATION TEMPLATE** button.

The website should allow the organising team to replace the template file without changing the page design.

---

9. PAGE 5 — STUDENT PROJECT EXPO

Heading: INNOVATING FOR IMPACT

Title: STUDENT PROJECT EXPO

Theme

Technology for a Sustainable and Smarter Future

Introduction

Showcase technology-driven solutions that address real-world challenges and create meaningful impact.

Participants may showcase existing or newly developed projects, including research projects, prototypes, working models, software products, hardware systems, robotics, IoT, AI/ML applications, sustainable technologies and other engineering innovations or proof-of-concepts.

All projects, including those under Open Innovation, must align with the central theme.

Project Categories

1. Sustainability & Environment

Waste management, pollution control, recycling, biodiversity conservation and environmental solutions.

2. Smart Infrastructure & Mobility

Smart cities, intelligent transportation, automation, connected infrastructure and mobility.

3. Energy & Resource Management

Renewable energy, energy efficiency, water management and efficient resource utilisation.

4. AI, IoT & Intelligent Systems

AI/ML applications, IoT, robotics, automation and connected technologies.

5. Healthcare & Social Innovation

Healthcare technology, accessibility, assistive solutions, public welfare and quality of life.

6. Open Innovation

Other creative engineering and technology solutions that contribute to a smarter, more sustainable future.

Expo Process

Phase 01 — Abstract Submission

Deadline: 20 November 2026

Participants must submit their project abstract in PDF format through the NEXUS registration portal.

Required information:

- Project Category
- Project / Product Title
- Brief Description
- Problem Statement and Proposed Solution
- Theme Relevance
- College and Team Details

Team size: 2–4 members.

All eligible registered teams proceed to the exhibition. Abstracts are reviewed for theme relevance, not shortlisting.

Phase 02 — On-campus Project Exhibition

Date: 25 November 2026
Venue: NMAMIT, Nitte

All eligible teams present and demonstrate their projects before the jury.

Presentation format:

- 7 minutes — Project Presentation and Demonstration.
- 3 minutes — Jury Interaction and Q&A.

Exhibition Guidelines

- Teams must bring their own project models, hardware, devices and required accessories.
- A working demonstration is strongly encouraged.

- All team members should understand the project and explain their individual contributions.
- Special infrastructure requirements must be communicated to the organising team in advance.
- The jury's decision will be final.

Website design requirements

- Clearly display the Expo theme.
- Display all six project categories.
- Separate Phase 01 and Phase 02 visually.
- Highlight the abstract deadline.
- Display team-size requirements.
- Provide a prominent REGISTER FOR PROJECT EXPO CTA that directs users to the registration form.

Do not implement jury scoring or results in this phase.

---

10. PAGE 6 — CONTACT DETAILS

Heading: STAY CONNECTED

Introduction

Have questions about NEXUS 2026?

For registration-related queries, participation details, project expo submissions or other event-related information, reach out to our organising team.

Contact Information

Shravya N Bhat
President, CSI NMAMIT
+91 8951236021

Pranjal Shetty
+91 8591310513

Connect With Us

Instagram: @csi_nmamit
Website: csinmamit.in

Provide the following links:

- Instagram profile
- NEXUS 2026 WhatsApp Group

The WhatsApp group should open through a link provided by the organising team.

Closing statement

CONNECT. COLLABORATE. CREATE IMPACT.

See you on 25 November 2026 at NMAMIT, Nitte!

---

11. PAGE 7 — REGISTRATION FORM

Heading: SECURE YOUR SPOT

Purpose: Collect only the information required to register a college delegation and its optional Project Expo entry.

The registration form must be separate from the informational website pages.

It should be short, clear, mobile-friendly and easy to complete.

Avoid unnecessary questions, repeated information and long descriptive inputs.

Registration Design

- Follow the same dark futuristic visual identity.
- Use clean form sections.
- Use conditional fields.
- Display a progress indicator.
- Provide clear field labels and validation.
- Show the five-representative limit before the form begins.
- Keep the form usable on mobile devices.

Section 1 — College Details

Required fields:

1. College Name
2. CSI Student Chapter Name
3. CSI Chapter ID (optional)
4. City

Section 2 — Faculty Coordinator Details

Required fields:

1. Faculty Coordinator's Name
2. Faculty Coordinator's Email ID
3. Faculty Coordinator's Contact Number

These details are collected for institutional coordination and verification.

The faculty coordinator's accompanying status must be captured separately so the system can enforce the five-person delegation limit.

Question: Is the faculty coordinator accompanying the delegation?

- Yes
- No

Section 3 — Delegation Details

Section description:

Maximum 5 representatives per college, including the faculty coordinator if accompanying.

Question:

Total Number of Representatives

Options: 1, 2, 3, 4, 5.

Collect the following details for each student representative:

1. Full Name
2. Department
3. Year of Study (1, 2, 3 or 4)
4. Contact Number
5. Email ID

Allow the registering person to add the appropriate number of student representatives based on the total delegation size.

Delegation validation

- If faculty coordinator is accompanying: maximum 4 students.
- If faculty coordinator is not accompanying: maximum 5 students.
- Maximum total representatives: 5.

Do not ask for the faculty coordinator's information again in the student list.

Section 4 — CSI Chapter Showcase

Every registered CSI student chapter participates in the Chapter Showcase.

Do not ask whether the chapter is participating.

Ask only:

Who will be presenting your CSI Chapter Showcase presentation?

Input type: Short answer.
Required: Yes.

Description:

Enter the name of the student representative who will deliver the five-minute chapter presentation.

Section 5 — Student Project Expo

Question:

Will your college be participating in the Student Project Expo?

- Yes
- No

If No, skip this section.

If Yes, display the following fields.

Project Details

1. Project / Product Title — Required.
2. Project Category — Required.
3. Brief Project Description — Required.
4. Project Abstract (PDF Upload) — Required.

Category options:

- Sustainability & Environment
- Smart Infrastructure & Mobility
- Energy & Resource Management
- AI, IoT & Intelligent Systems
- Healthcare & Social Innovation
- Open Innovation

Expo Team

Team size: 2–4 members.

Allow the user to select Expo team members from the already-entered student representatives.

Do not ask for their names, emails and phone numbers again.

Validate that:

- The team contains 2–4 members.
- All selected team members belong to the registered college delegation.
- The team satisfies the college's overall five-representative limit.

Abstract Instructions

Display:

- Deadline: 20 November 2026.
- PDF format only.
- The abstract should explain the project, problem statement, proposed solution and theme relevance.
- Existing and newly developed projects are accepted.
- All eligible registered teams proceed to the exhibition.
- Abstracts are reviewed for theme relevance, not shortlisting.

Recommended PDF upload limit: 10 MB, subject to confirmation.

Section 6 — Accommodation Requirements

Section description:

Participants requiring accommodation must indicate their requirements below. Accommodation is subject to availability.

Question:

Do you require accommodation?

- Yes
- No

If Yes, display:

1. When do you plan to arrive?
    - 24 November 2026 (Previous night)
    - 25 November 2026 (Event morning)
2. Number of male participants.
3. Number of female participants.
4. Names of participants requiring accommodation.

The names should preferably be selected from the registered delegation list.

Validate that the total accommodation count does not exceed the number of registered representatives.

Display:

Accommodation is subject to availability. Submission of a request does not guarantee accommodation.

Section 7 — Declaration

Required checkbox:

"I confirm that the information provided is accurate and that our college understands the NEXUS 2026 participation guidelines, including the delegation limit and Student Project Expo requirements, wherever applicable."

Button:

SUBMIT REGISTRATION

Successful Registration

After successful submission:

- Generate a unique registration ID.
- Display a registration success message.
- Send confirmation to the college coordinator.
- Provide the NEXUS 2026 WhatsApp group link.
- Provide a registration summary.

Suggested message:

"Your registration for NEXUS 2026 has been successfully submitted!

Your registration ID is NEXUS26-XXXX.

We look forward to welcoming your delegation to NMAMIT, Nitte, on 25 November 2026."

The confirmation must not imply that accommodation has been guaranteed or that the Expo project has received jury approval.

---

12. ADMIN DASHBOARD — PHASE 1

A secure admin dashboard is required to manage registrations.

Overview

Display:

- Total college registrations.
- Total student representatives.
- Total accompanying faculty coordinators.
- Total registered delegations.
- Total Chapter Showcase entries.
- Total Expo projects.
- Total accommodation requests.

Registration Management

Admin should be able to:

- View all registrations.
- Search by college name or registration ID.
- View college and faculty details.
- View all student representatives.
- View the Chapter Showcase presentation lead.
- View Expo participation details.
- View and download abstracts.
- View accommodation requests.
- Edit records when authorised.
- Mark registrations as verified.
- Export registration records to CSV or Excel.

Expo Management

Admin should be able to:

- View all submitted projects.
- Filter by project category.
- View college and team details.
- Download abstract PDFs.
- Add internal remarks.
- Track abstract review status.

Suggested statuses:

- Not Reviewed
- Reviewed
- Clarification Required
- Clarification Received

Do not implement jury allocation, scoring or project rankings yet.

---

13. DATABASE REQUIREMENTS

Use a structured database.

Recommended entities:

College Registration

- Registration ID
- College Name
- CSI Chapter Name
- CSI Chapter ID
- City
- Faculty Coordinator Name
- Faculty Coordinator Email
- Faculty Coordinator Contact
- Faculty Accompanying Status
- Chapter Showcase Presenter
- Accommodation Request
- Registration Status
- Submission Timestamp

Participants

- Participant ID
- Registration ID
- Full Name
- Department
- Year
- Contact Number
- Email Address
- Participant Type

Expo Projects

- Project ID
- Registration ID
- Project Title
- Category
- Description
- Abstract File Reference
- Review Status
- Internal Remarks

Expo Team Members

- Project ID
- Participant ID

Admin Users

- Admin ID
- Name
- Email
- Role
- Authentication Data

Maintain separate linked records rather than storing all information as one unstructured form response.

This will allow future jury management, evaluation, certificates and attendance to be added without changing the core registration structure.

---

14. FUNCTIONAL REQUIREMENTS

ID	Requirement	Priority
FR-01	Landing page with NEXUS branding	Must
FR-02	About NEXUS and host profiles	Must
FR-03	Event schedule page	Must
FR-04	Industry panel page	Must
FR-05	Chapter Showcase page	Must
FR-06	Project Expo page	Must
FR-07	Contact page	Must
FR-08	Dedicated registration page	Must
FR-09	College-level registration	Must
FR-10	Faculty coordinator details	Must
FR-11	Five-person delegation validation	Must
FR-12	Dynamic student representative fields	Must
FR-13	Chapter Showcase presenter field	Must
FR-14	Conditional Project Expo form	Must
FR-15	PDF abstract upload	Must
FR-16	Expo team member selection	Must
FR-17	Accommodation request	Must
FR-18	Declaration and final submission	Must
FR-19	Unique registration ID	Must
FR-20	Confirmation page and email	Must
FR-21	Admin dashboard	Must
FR-22	Search and export registrations	Must
FR-23	WhatsApp group integration	Should
FR-24	Downloadable registration summary	Should

---

15. NON-FUNCTIONAL REQUIREMENTS

Responsive Design

The website must work on:

- Desktop
- Laptop
- Tablet

- Android phones
- iPhones

Mobile design is especially important because many participants will access the registration form through WhatsApp and Instagram.

Performance

- Optimise hero images.
- Use responsive image sizes.
- Lazy-load below-the-fold imagery.
- Avoid unnecessarily heavy animation libraries.
- Keep registration submission fast and reliable.

Security

- Secure admin authentication.
- Role-based access.
- Server-side validation.
- Secure file uploads.
- PDF-only validation for abstracts.
- Private storage for uploaded documents.
- Protect participant personal information.
- Do not expose registration records through public APIs.

Accessibility

- Good contrast.
- Readable body text.
- Keyboard-accessible forms.
- Clearly labelled inputs.
- Visible validation messages.
- Reduced-motion support.

Reliability

- Prevent duplicate form submissions.
- Preserve entered data when moving between form sections.
- Provide meaningful errors when an upload fails.
- Ensure that registration and associated participant/project records are saved consistently.

---

16. TECHNICAL IMPLEMENTATION

The final technology stack should be selected after inspecting the existing csinmamit.in codebase.

Recommended architecture:

Frontend

- Public website pages.
- Registration form.
- Responsive admin dashboard.

Backend

- Registration APIs.
- Form validation.
- Participant limit enforcement.
- File upload handling.
- Confirmation email service.
- Admin authentication.

Database

- College registrations.
- Participants.
- Expo projects.
- Expo team relationships.
- Admin users.

File Storage

- Project abstract PDFs.
- Presentation template and other downloadable resources.

Technical principles

1. Reuse the existing CSI website stack wherever practical.
2. Keep NEXUS logically separated as a module.
3. Use relational database relationships.
4. Keep uploaded abstracts private.
5. Store secrets in environment variables.
6. Implement all critical rules on the server.
7. Design the database for future modules.

17. ACCEPTANCE CRITERIA

The first release is ready when:

- All seven public pages are accessible.
- The website reflects the supplied NEXUS visual identity.
- The event date is consistently 25 November 2026.
- The navigation follows the specified page order.
- All informational pages contain the approved content.
- The registration form is separate from informational pages.
- College registration works.
- Faculty and student details are captured correctly.
- The five-representative limit is enforced.
- Chapter Showcase presenter details are collected.
- Expo fields appear only when required.
- Expo teams contain 2–4 registered students.
- Abstract PDF upload works.
- Accommodation requests are captured.
- A unique registration ID is generated.
- Confirmation is sent successfully.
- Admins can manage and export registrations.
- The website works on mobile and desktop.
- No duplicate registrations are created by repeated submissions.

---

18. DEVELOPMENT PRIORITY

Implement in this order:

Stage 1 — Inspect Existing Website

- Review current csinmamit.in source code.
- Identify framework, database, hosting and existing design system.
- Identify reusable components.
- Confirm how the new NEXUS module will integrate.

Stage 2 — Build Design Foundation

- Set up typography and colours.
- Create navigation and footer.
- Build responsive page layouts.

- Implement the hero and shared visual components.

Stage 3 — Build Public Pages

- Landing page.
- Schedule.
- Industry Panel.
- Chapter Showcase.
- Student Project Expo.
- Contact.

Stage 4 — Build Registration

- College details.
- Faculty coordinator.
- Delegation details.
- Chapter Showcase presenter.
- Conditional Expo registration.
- Accommodation.
- Declaration and submission.

Stage 5 — Backend and Admin

- Database schema.
- APIs.
- PDF storage.
- Email confirmations.
- Admin dashboard.
- Export functionality.

Stage 6 — Testing and Deployment

- Test all registration conditions.
- Test delegation limit.
- Test Expo team selection.
- Test abstract upload.
- Test mobile experience.
- Test admin permissions.
- Deploy and verify the complete live flow.

---

19. IMPORTANT PRODUCT DECISIONS

The following decisions must be retained during development:

1. **Final event date: 25 November 2026.** This overrides older brochure/poster references to 29 November.
2. The website is an informational multi-page experience followed by a separate registration page.
3. The page sequence is fixed: Home → Schedule → Industry Panel → Chapter Showcase → Project Expo → Contact → Register.
4. Every registered CSI chapter participates in the Chapter Showcase. Ask only for the presentation lead's name.
5. The college-level delegation limit is five representatives, including an accompanying faculty coordinator.
6. Expo team size is 2–4 members.
7. Expo team members should be selected from registered student representatives rather than entered again.
8. The Expo abstract deadline is 20 November 2026.
9. Accommodation requests are subject to availability.
10. Jury management and project evaluation are deferred to a later phase.
11. Keep registration short and collect only essential information.
12. The website's visual identity must remain consistent with the supplied NEXUS poster and brochure.

FINAL PRODUCT DIRECTION

NEXUS should feel like a flagship technology summit with its own distinct identity — not a generic college event website.

The public website should communicate the event, its hosts, schedule and opportunities through a visually engaging experience. The registration system should be straightforward enough for a college representative to complete without unnecessary effort.

One identity. One connected student community. One day of innovation.
